

In the Claims:

Please cancel claims 56-58 without prejudice.

Please amend the claims to read as follows:

1-27. (Canceled)

28. (Previously Presented) A process for producing a human-tropic PERV-free swine from parental swine at least one of which is human-tropic PERV-positive, comprising:

(a) mating a male and a female swine of the same species wherein at least one of said swine is positive for a human-tropic PERV-locus whereby said mating produces offspring; and

(b) screening said offspring for the presence of said human-tropic PERV and selecting offspring free of human-tropic PERV,  
thereby producing a human-tropic PERV-free swine.

29. (Previously Presented) A process for producing a human-tropic PERV-free swine from parental swine at least one of which is human-tropic PERV-positive, comprising:

(a) mating a male and a female swine of the same species wherein at least one of said swine is positive for a human-tropic PERV-locus and thereby producing offspring;

(b) mating a male swine produced in (a) with a female swine produced in (a) wherein at least one of said male and female is positive for a human-tropic PERV-locus and wherein if both are positive for an PERV-locus then said male and female are not each positive for the same human-tropic PERV-locus; and

(c) screening said offspring for the presence of said human-tropic PERV and selecting those offspring that are human-tropic PERV-free

thereby producing a human-tropic PERV-free swine.

30. (Canceled)

31. (Previously Presented) The process of claim 29 wherein said human-tropic PERV-free swine is a miniature swine.

32. (Previously Presented) The process of claim 31 wherein said miniature swine is of the D/D haplotype.

33. (Canceled)

34. (Previously Presented) The process of claim 29 wherein said human-tropic PERV loci are determined using oligonucleotide probes.

35. (Currently Amended) The process of claim 29 wherein both male and female swine mated in step (a) are human-tropic PERV-positive and wherein the offspring of (a) that are mated in (b) are each human-tropic PERV-positive animals swine.

36. (Currently Amended) The process of claim 29 wherein said human-tropic PERV-free swine is a miniature swine wherein both male and female swine mated in step (a) are human-tropic PERV-positive and wherein the offspring of (a) that are mated in (b) are each human-tropic PERV-positive animals swine.

37. (Previously Presented) The process of claim 36 wherein said miniature swine is of the D/D haplotype.

38. (Previously Presented) The process of claim 35 wherein the swine mated in (a) are each positive for all but one human-tropic PERV-locus, said male and female so

mated are each negative for a different PERV-locus, and the male and female of each mated pair of offspring mated in (b) are each, positive, if at all, for a set of human-tropic PERV-loci with no human-tropic PERV loci in common.

39. (Currently Amended) The process of claim 38 wherein step (a) comprises mating swine carrying a first set of PERVs and swine carrying a second set of PERVs wherein each of said first and second sets of PERVs comprises at least one PERV not present in the other set, to produce offspring and step (b) comprises mating offspring of (a) whereby such mating is between a first animal swine that carries PERVs present in both of said first and second sets of PERVs but no PERV not present in both of said first and second sets of PERVs and a second animal swine that carries the PERVs present in said first and second sets of PERVs but not present in both of said first and second sets of PERVs.

40. (Currently Amended) The process of claim 39 wherein said swine in step (a) carrying said first set of PERVs are is a male swine and said swine in step (a) carrying said second set of PERVs are is a female swine.

41. (Currently Amended) The process of claim 39 wherein said second swine in step (b) ~~carrying PERV 3, 4 are~~ is a male swine and said first swine in step (b) ~~carrying PERV 1, 2 are~~ is a female swine.

42. (Canceled)

43. (Previously Presented) The process of claim 41 wherein said swine produced by the said process is a miniature swine.

44. (Previously Presented) The process of claim 43 wherein said miniature swine is of the D/D haplotype.

45. (Previously Presented) A swine produced by the process of claim 28 wherein said swine is an inbred swine.

46. (Canceled)

47. (Previously Presented) The swine of claim 45 wherein said swine is a miniature swine.

48. (Previously Presented) The miniature swine of claim 47 wherein said miniature swine is of the D/D haplotype.

49. (Previously Presented) A swine produced by the process of claim 29 wherein the said swine is an inbred swine.

50. (Canceled)

51. (Previously Presented) The swine of claim 49 wherein said swine is a miniature swine.

52. (Previously Presented) The miniature swine of claim 51 wherein said miniature swine is of the D/D haplotype.

53. (Currently Amended) A transplant comprising an organ, tissue or cells from ~~the an inbred human-tropic PERV free swine produced by the process of claim 28 wherein the said swine is an inbred swine.~~

54. (Currently Amended) A The transplant ~~comprising an organ, tissue or cells from the swine~~ of claim 53 wherein the said swine is a miniature swine.

55. (Currently Amended) A The transplant ~~comprising an organ, tissue or cells~~  
~~from the miniature swine~~ of claim 54 wherein the said miniature swine is of the D/D  
haplotype.

56 - 58. (Canceled)

Please add the following new claims:

59. (New) The transplant of claim 53 wherein said swine was produced by the  
method of claim 28.

60. (New) The transplant of claim 53 wherein said swine was produced by the  
method of claim 29.
